Dragon Ball Z Devolution brings back the nostalgia of the classic Dragon Ball Z series with its retro pixelated format. Players can step into Son Goku's shoes and engage in thrilling battles at the World Martial Arts Tournament, facing off against a range of foes from the Dragon Ball saga each with unique abilities. With 32 iconic characters to choose from, players can challenge the CPU or compete against friends. The game is all about mastering moves, unleashing powerful attacks, and dodging enemy strikes to prove one's strength. It's a classic game with a vibrant retro aesthetic that lets players test their skills, fight for the top spot, and relive the excitement of the Dragon Ball universe. Help Goku Fight the Aliens and Evil Forces in Dragon Ball Z Devolution! Goku needs your help to fight against various aliens and evil forces threatening Earth, where he now lives as its protector, alongside the Z Fighters. Play DBZ Devolution and join him in saving the world. After completing training with Master Roshi, you unlock the story mode where you play through the entire DBZ story as Goku, assuming other protagonist roles like Gohan or Trunks at times. Start at the 23rd BUDOKAI, the biggest martial arts tournament on Earth, where you face Piccolo. Here's how to fight with Goku: - Move using four arrow keys (W/A/S/D). - Dashing is done by pressing a directional arrow key twice in a row. - Use attack moves by pressing X. - Break the opponent's guard by combining a dash with an attack, then press C to charge up Chi for special attacks. - Use energy balls and the KAMEHAMEHA when fully charged. - Win fights by depleting the enemy's health bar first. Combine fighting moves and defense for a winning strategy! We understand that internet ads can be annoying. I wanted to pay tribute to Akira Toriyama for the massive work he did drawing the 42 volumes of the Dragon Ball series from 1984 to 1995. The graphic style is inspired by the Dragon Ball Z Goku Gekitōden role-playing game on GameBoy: I had loved the SD character designs and planned to create an action game. Being in high school, I started development on a calculator Ti-89 but had to give up due to difficulties with assembly programming... But I kept the idea in mind. In 2004, I transferred the game's base onto PC using Flash 5/Actionscript, giving birth to "Dragon Ball Z Tribute." One of the first playable versions was found on Newgrounds. That's also the only time I posted it on an external site. All other sites hosting it have stolen it. Even when they call it a "curation"... If you like this game, support the project by playing on this page, not elsewhere. In 2011, the game became "Dragon Ball Z Devolution." Since then, it has been regularly updated. It gained in colors, music, story, and fighters. Many talented people have joined me in the adventure to improve and complete the content... Notably Darvel, who did an incredible job with the music. In 2019, the game covered so many sagas and different characters that it changed its name again to "Dragon Ball Devolution" for simplicity. The death of Flash in 2021 didn't change anything about the project: the game now runs on Ruffle, the Flash emulator. You don't have to worry! contre vos amis ? S'il vous plaît, lisez attentivement le tutoriel. L'expérience se poursuivra, mais il reste encore beaucoup de choses à ajouter : des personnages, des pouvoirs, des décors, des géants et des histoires... Tout est prévu, mais je travaille en temps libre, alors n'ayez pas peur de me donner vos encouragements ❤(Vraiment, soyez gentils !)
